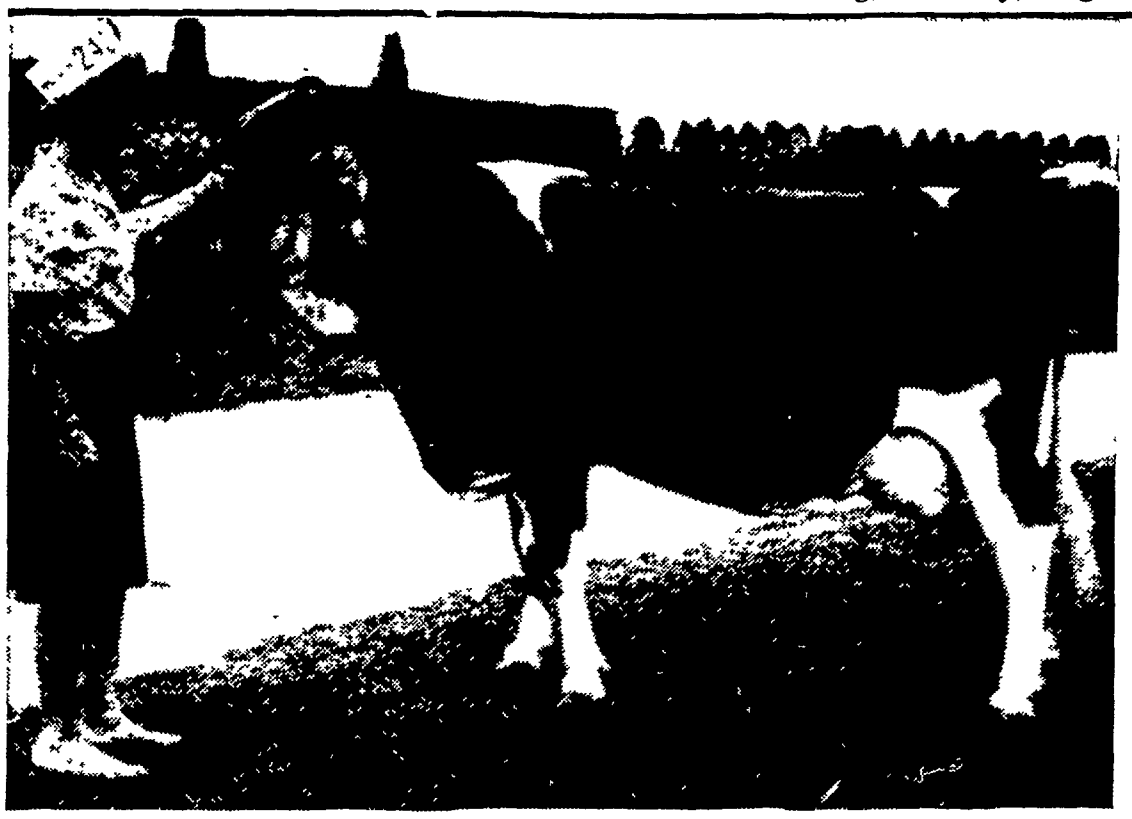
Lancaster Farming

VOL. 10 NO. 39 — Lancaster Farming, Saturday, August 28, 1965 — $2 Per Year



OLIVERDALE INSPIRATION TERRY, GRAND CHAMPION of the southeast district black and white show is shown here by Mrs. Robert Kauffman. The nine-year-old champion is jointly owned by Robert H. Kauffman and J. Robert Hess. She was also winner of the aged cow class and was senior champion.

Lancaster Co. Dairymen Win In All Major Classes At Black And White Show

Holstein breeders from Lancaster County swept the Southeast District Black and White Show this week at Hershey to retain the drought-breaking crown which was recaptured last year after a "dry spell" of several years.

Leading the champions was a nine-year-old Holstein cow owned in partnership by Robert H. Kauffman, Elizabethtown R1, and J. Robert Hess of Strasburg R1. She is Oliverdale Inspiration Terry, she took the aged cow class, senior championship, and grand championship for the Kauffman-Hess team In tapping her for senior champion, judge Jack Fairchild put her over 120 other females two years old and over, and for the grand championship, over approximately 265 other females.

Grand Champion Honors To Wylie In 4-H Hog Show

Sam Wylie, Bryn Mawr, won top honors Friday evening at the Chester County 4-H Swine Roundup, held at the Vintage Livestock Auction, Paradise, Pa His 220-pound hog won grand champion honors over twenty-five other entries Sam also worked his way to first place in the fitting and showing contest. His champion hog was purchased by New Holland Sales, New Holland, for 75 cents per pound. The 4-H Pig Sale also was held at the Vintage Livestock Auction, Saturday morning. Auctioneer for the sale was Norman Hart

Reserve champion hog, exhibited by Etha McDowell, Oxford R2, was purchased by Devault Packing Co, Devault, for 36 cents per pound Average price for the 4-H pigs, excluding these two champion hogs was $27 40 per hundred Average weight was 213 pounds

A total of twenty-six 4-H pigs were exhibited at the

Election For ASC Committee Set For Sept. 2

Eligible voters in the county received ballots this week for the upcoming election of community committees to serve under the Agricultural Stabilization and Conservation Service for the coming year.

The sixteen community committees will assist the ASC county committee, according to Fred Seldomridge, county ASC chairman A farm owner, tenant, or share-cropper is eligible to vote if he is eligible to take part in one or more of the programs administered by the ASC committees.

Ballots must be marked and

ABC To Hold "Parade Day" At Lanc. Sept. 2nd

Thursday, September 2, has been designated "Atlantic On Parade" Day for dairymen throughout the Atlantic Breeders Cooperative service area, according to David Yoder, general manager Special "Parade" events will be held all day at Lancaster headquarters.

Tours of facilities and exhibits will begin at 10:30 a.m., a chicken barbeque will be served starting at 11:30, and the afternoon program will follow. Appearing on the program will be Mark N. Witmer of Dalmatia, Pa., president of the cooperative. Stud sires will be paraded and comments made on their bloodlines and transmitting abili-

State And Individuals Save $25-Million On Conservation Costs

The non-federal contribution in designing and laying out conservation practices increased by more than 53 percent during the past five years, the USDA's Soil Conservation Service announced recently.

During fiscal year 1965, about 3,516 man-years of work was contributed by farmers, ranchers, state and local government employees, district managers, and private contractors. This compares with 2,357 man-years in 1960.

This contribution is valued at more than $25 million for 196[illegible], based on what it would have cost SCS in additional staff to do the same work, officials said

D A Williams, SCS Administrator, said, "The increasing non-Federal activity over the past five years shows accelerated interest in the need for resource conservation. And the $25 million, indeed, represents a substantial contribution by state and local interests for the establishment of conservation measures on the land."

Approximately half (1,723 man-years) of the time was contributed by individual land owners and operators. Much of their time was spent di-

100 Area Holstein Herds Officially Classified For Breed Conformation

The Holstein-Friesian Association of America recently reported that 100 Holstein herds in the area had been classified for body type by official inspectors Ronald C Chapman, Emmetsburg, Iowa; Cylde Wilson, Rushville, Pa; and Merle E Howard, Hales Corners, Wisconsin.

Classification measures the physical conformation of individual animals against the theoretical perfection of the "true type" cow or bull.

The following Holstein breeders had their herds classified according to the report (the information is arranged alphabetically by towns).

More TDN In Corn Silage At Full Dent Stage

Corn silage made at the full dent to early glaze stage of grain maturity will give the greatest yield of feed nutrients per acre and the highest percentage of digestible energy, it was reported this week from experiments at The Pennsylvania State University.

Describing the findings was John W. Bratzler, professor of animal nutrition at Penn State, who said the total digestible nutrients (TDN) of corn silage increase as the plants mature to full dent stage

Dr Bratzler and associates also found that 50 to 60 percent of the dry matter of the corn plant is contained in the ears when harvesting takes place at the time of peak silage value

"The exceedingly low dry matter content of the corn plant in it's early stages of maturity is enough to urge that it should not be used for en-

200 Cows Per Hr. Through New Bath Facilities

According to Horace L. Mann, Pennsylvania Farm Show director, a new bovine bathing and barbering installation guarantees clean cows for the second Pennsylvania All-American Dairy Show to be held at the Farm Show Building September 13-17.

Five wash racks distributed over the 13-acre complex, each with a capacity of ten cows and a turnover at 15-minute intervals, means 200 can bathe in an hour, Mann figures

If entries reach last year's total of nearly 2,500 head the bath rooms will be in steady use half-way 'round the clock.

Electric cables have been strung overhead above all stalls for power clippers and

USDA Issues Policy Statement On Packers And Stockyards Act

The U S Department of Agriculture has outlined details of a proposed Packers and Stockyards Act policy statement covering meat sales and purchase contracts, to serve as a guide to packers (including retailers who slaughter livestock or manufacture or prepare meat and meat food products in commerce) and others in the meat industry in settling contract disputes.

The policy statement, proposed by USDA's Consumer and Marketing Service, sets forth the factors which C&MS would consider—when contract disputes are brought to its attention—in determining possible violations of the P&S Act.

Officials of C&MS's Packers and Stockyards Division ex-

"THE OLD DEPENDABLE" — SECOND TO NONE

Weekly Poultry Report

Eastern Pennsylvania And New Jersey

WEEKLY SUMMARY

LIVE HENS

Prices unchanged on light type hens. Demand fair for light offerings. Interest for heavy type hens only fair for adequate offerings. Occasional flocks sold at 16c. Prices paid at farms: Light Type hens 7-8¼, mostly 7½-8¼c. Heavy type hens, too few to report.

TURKEYS

Demand fair for hens, good for toms. Supplies fully adequate on hens, light on toms. Prices on heavy type 13-15# hens ranged 23-23½c. A few heavy type 25-28# toms sold at 23c.

Fogelsville

August 24, 1965

(Prices for dock weights, cents per lb. except where noted.)

Hens, light type 7-9, mostly 7½-8½; Hens, heavy type 8-18, 12-16; Pullets 14-31½, 23½-31; Roasters 11-28½, 19-25½; Turkeys, toms 15-21½, 21½; Turkeys, hens 30-33; Rabbits 20-30, 24-29; Pigeons (per pair) 65-1.10, 65-72½; Jumbo Squab 70-78. Total coops sold: 962.

Eastern Shore Exchange

WEEKLY SUMMARY

Broilers and fryers live prices on the Eastern Shore Exchange averaged 16.54 cents per lb. this week, up .33 cent over last week's average.

Prices paid ranged from a high of 17.3 cents on Tuesday to a low of 15.4 on Thursday.

Sales for the week totaled 1,232,000 head, nearly ½-million head less than the preceding week.

Delmarva

August 27, 1965

Delmarva live broiler and fryer prices declined approximately ¼ cent with only fair demand for moderate auction offerings.

Ready-to-cook demand irregular, ranging from fair to good. Feature activity for next week based on an unchanged to slower market; undertone slightly unsettled.

Estimated slaughter for this weekend 949,000 head, compared to 852,000 head last weekend.

In the 24-hours preceding market close on Friday, broilers and fryers live prices ranged from 15.4-16.5 cents per lb. on sales of 1,101,800 head.

Safety With Pesticides

Don't use your mouth to blow out clogged lines, nozzle tips, or other equipment parts, or to siphon a pesticide from a container, cautions Herbert Cole, Jr., agricultural chemicals coordinator at Penn State. Call your physician at once if someone in your family accidentally swallows a pesticide or if you feel ill after using one. Read the label to your physician, naming the active chemical ingredient. If you must go to his office, take the container with you.

From Where We Stand . . .

Sailing Through Life

If we had an award for the "best answer of the week" it would have to go to Robert Manry, the 47-year-old newspaperman who recently completed a 78-day crossing of the Atlantic Ocean in a 13½-foot dinghy he calls the "Tinkerbelle" When asked by an English reporter whether he had set out to establish a small boat record, Manry replied, no, he set out to cross the ocean and the 30-year-old Tinkerbelle happened to be the size boat he had!

Think about that a little bit; there's a moral in it that can benefit us all on our voyage through life. Instead of worrying about the size of the other guy's "boat", why not simply decide what course we want to steer through life's wild seas and use what we have to its best advantage?

Manry's one-man stunt showed other virtues which we all need to consider as we take stock of what we are. The greatest of these was probably courage. Courage to face the challenge of the unknown alone using only what he had and what he had learned. And he had faith in himself. He prepared as thoroughly as possible. He knew what he was up against and he tried to build in advance an understanding of all the trials he would encounter. He was so sure his course was right that he stuck to it inspite of rough seas and lashing gales, and he struck his target, Falmouth, England, right smack on the nose.

Bob Manry's world will never be quite the same again, writes one of his fellow-workers. If each of us could take incentive from this man's efforts and apply them to our daily lives, we would find our private world too was changed — for the better If we could thus improve enough "small worlds", perhaps a little bit might even rub-off on the big world!

*What Do **YOU** Think?*

Free Rent

In discussing the United Nations and its worsening financial condition, the late Ambassador Adlai Stevenson once said, " . . . the house resounds endlessly with family quarrels. There are cracks in the walls, and inside the cold winds of war and danger and strife from every quarter of the globe rattle the doors and windows. And as usual in such cases, quite a few of the tenants are behind on the rent."

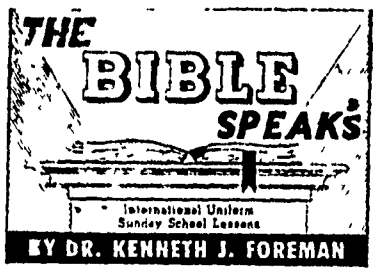
Last week the United States through its new Ambassador, Arthur Goldberg, said in effect, "all is forgiven; anytime you boys don't care to pay up, don't worry about it; Uncle's got more money than he knows what to do with anyway. And the Russians bluffed us out again!

The U S said officially that the year-long deadlock in the General Assembly had to be ended or the U.N. would be rendered useless. So we picked up the tab, as usual. The experts say that the money was secondary to the principle — the principle in this case being the continuing role of the U.N. as world policeman. Perhaps they are right. We couldn't get off our own goal line with stubborness alone, so, as in some football situations, we kick the ball back to the opposition and play for a break.

This was done not as a solution, but as an easing of the existing impasse. It's a desperate strategy, and without knowing what events may unfold in the future to act upon the players, no one can predict whether it will work.

Goldberg does not have a record of playing on the losing team, nor does his record suggest he will give away points needlessly to the other team. We hope that he and "the coach" will not be too eager to repeat that "giveaway play" again in this game. They're behind the opposition on points, and the late afternoon shadows already hang heavy over the stadium C'mon team! We **NEED** a touchdown!

JUNIOR CHAMPION at the district black and white show was this two-year-old Ivanhoe daughter Star Segis Osborndale She was shown by Daryl Bollinger of Lititz R1 and will reappear in the FFA district show next week



Under Pressure

Lesson for August 29, 1965

Background Scripture: Ephesians 6 10-20; James 4 1-8, 1 John 2 15-17.
Devotional Reading: Psalm 26.

YOU NEVER know what kind of stuff a man is made of till you have seen him under pressure. You never know what sort of Christian a man is until you have seen him under pressure. We all think we could do a better job of whatever we are doing if only we could get out from under pressure. But some pressure you will always find against you as long as you live. Not just the same, of course. What seems like terrific pressure at eight years old or whenever it was that the school-yard bully was making life miserable for us, is not the kind of trouble we get when we are worrying most about how to get money to pay the tax collectors. But pressure of some kind or other is lifelong trouble, off and on if not every minute. The Bible does not promise freedom from pressure; it shows us how to stand up under it.

Dr. Foreman

The Enemy

A real Christian lives a hard life. That is, he is constantly under attack not to be a Christian. It is hard to believe that God should have enemies, but he does. And God's enemies are your enemies. This is just as true of a sinner as of a saint, a bad man and a good one. To put it as plainly as possible: God wants the human race to succeed; and there are enemies of God who are also enemies of the human race. Saint Paul's writings are full of the thought of the Christian life as a fight, a contest, a struggle. At the close of his life he says, "I have fought the good fight!" He had many enemies; but in writing to the Ephesians he is plainly not thinking of human hostility, however dangerous that may be. He is thinking of super-human enemies — our wrestling is not against flesh and blood, he says. He calls our enemies "principalities and powers, world-rulers of darkness . . . spiritual hosts of wickedness in heavenly places." He does not explain what these are; but it is clear that the pressures on the Christian are most dangerous because their source is supernatural. The terrifying thought here is that we as Christians, as human beings indeed, are under attack by forces more ancient, shrewd and vicious than all our own powers can overcome.

What is at Stake?

If you prefer to think, as many do, of the "devil" and all these "rulers of darkness" as figures of speech for strictly human forces, you can see Paul's point even so. Considering the many evil men in the world, all the forces pressing against the lives of decent people, whether Christian or not, to tear down their character and destroy their lives, you get a sinking feeling in the pit of your stomach. But why the hatred, why the pressure? What is at stake? Nothing less than your destiny and the destiny of the race. What hope is there for us?

Reinforcements

Paul pictures for us just such a soldier as may have been standing guard at his cell at that very time. As he mentions each piece of the soldier's armor, he likens it to something that the Christian needs and uses in his fight against the pressures of evil day by day. The climax of it all is in two words: Stand, and Pray. Stand; don't run away; if you can't advance, at all events don't retreat. Don t compromise with evil, don't negotiate with the devil. ("He must have a long spoon who eats with the devil," as the old saying has it) Don't start fighting tomorrow, stand up and fight now! But even with all the armor of God, even with the shield of faith and the sword of the Word of God, you will still be a loser if you stand alone, so Pray! Prayer is asking God for reinforcements.

Go To Church Sunday

Now Is The Time . . .

To Substitute Small Grains For Corn

Dairymen and other livestock producers who are getting short of corn for their grain feeding should consider the use of small grains as a substitute until the new corn crop is harvested Barley and wheat approach corn in TDN or energy content, and are useful when corn supplies are short, both are higher in protein than corn Either or both of these grains may make up to 35% of the grain mixture for dairy cattle and the barley may make up to 90% of the grain mixture for fattening beef cattle or hogs When wheat is introduced into the ration, it should be ground or cracked and introduced slowly to the herd

MAX SMITH

To Test Hay Samples For Winter Feeding

Dairymen are urged to submit samples of their barn stored hay soon in order to get started on their winter feeding recommendations Hay that is made and stored can now be tested and will permit quicker servicing of feed program requests in the fall and winter months

To Beware of Acorns

Dairymen that are grazing their milking herd under oak trees should be on the alert for acorns that have fallen to the ground Some animals will seek out these acorns and consume all they can find A few acorns will do little harm, however once they get started eating them some cows may be thrown off feed, and their milk flow will be reduced for the remainder of this lactation Acorns are not for dairy cows

To Topdress Pastures

Livestock producers who are interested in getting maximum production from their permanent grass stands should topdress now with either a complete fertilizer or with straight nitrogen this application will encourage maximum growth this fall until the ground freezes This is another way to stretch the pasture season and reduce the need of as much stored feed. With the moisture conditions being good in most parts of the county the early fall application of fertilizer should give excellent results.

FARM WOMEN #3 OFF TO SHORE

At the regular monthly meeting of the Society of Farm Women, Group No 3, held recently at the home of Mrs. Ivan Eberly of Ephrata R1, final plans were made for a bus trip to Atlantic City. The buses will leave the Lincoln Parking lot at 7 a m. August 28

Miss Mary Royer of the cancer dressing committee reported that dressings are needed by the Cancer Society, and plans were started to work on these

Plans were also begun for the food stand at the Ephrata Street Fair which will be held from September 22-25.

A nominating committee was appointed to select officers for 1966. They are Mrs. Robert Hollinger, Mrs. Esther Petticoffer, and Mrs. Frank Snyder.

The guest speaker was Mrs. Kenneth Eshelman of Conestoga R2, a past county president. She reviewed the book, "The Time of the End," by Kathryn Dougherty.

The next meeting will be held on September 18 at the Educational Bldg. of Salem Lutheran Church, Lincoln. Members of Group 16 will be guests.

Hoffman SEEDS

FOR THE QUALITY THAT MEANS

Bigger Yields

PENNRAD Certified Barley is a new variety developed at Penn State. It carries all the good yielding and winter hardiness characteristics of Hudson, but without the troublesome beards. Has good resistance to the disease which commonly attack barley Stiff straw. Supply of seed limited.

WONG Certified Barley Heavy yielding, beardless, Hoffman foundation stocks are hot water treated for smut control

REDCOAT Certified Wheat A consistently high producer in tests at Penn State University, with highest yield of four recommended varieties in 6 of the 8 years tested. Strong straw. Noted for winter hardiness, resistance to mildew, rust and Hessian Fly.

Other high-yielding Hoffman wheat varieties are **PENNOLL** and **DUAL.**

NORLINE Certified Winter Oats are more hardy than older varieties of winter oats. A good yielder with good bushel weight. A strong favorite.

See your Hoffman Seed Man or Phone 898-3421 for full details.

roundup. The pigs were divided into three weight classes for judging.

In the light-weight class (200 lb. and under), first place went to Paul Holcombe, and second place to his sister Cathy, Pottstown R2.

First-place hog in the medium-weight class, (200-220 lb.) was the grand champion shown by Wylie. Second place was won by Howard McDowell, Oxford R2.

The reserve champion hog shown by Etha McDowell was first in the heavy-weight class (over 220 lb.) and a hog shown by her sister Jennifer was second.

The first-year fitting and showmanship contest winners were first, Loretta Yoder, Elverson R2, and second, her sister Lucy Yoder In the senior fitting and showmanship contest, top honors went to Sam Wylie, and second place was won by David Robinson, West Chester R5.

The official judge for the 4H roundup was Max M Smith, Lancaster County Agricultural Agent

● P & S Act

(Continued from Page 1)

plained that the agency receives numerous complaints alleging that buyers failed to pay for meat in accordance with purchase contracts, or refused—without justification—to accept delivery.

Most of these complaints, the P&S Division said, concern grade, weight, condition, shipping instructions, or time of arrival.

In administering the P&S Act, C&MS is called into these contract disputes to ascertain whether the P&S Act has been violated. The new proposal outlining the P&S Division's policy under the Act is intended to serve as a guide to the industry in such matters.

The proposed policy statement points out that all terms of a transaction should be made clear in the contract, whether it is written or verbal. If there is any chance of misunderstanding, a written confirmation should be exchanged between the parties.

When contract disputes cannot be settled between the parties, and either party intends to file a complaint under the P&S Act, the proposal continues, the complaint should be made as soon as possible to the nearest P&S Division area office.

If there is reason to believe that any packer buyer has unjustifiably refused to pay the contract price for purchased meat or meat food products, or has refused to accept a shipment, or if any packer seller has unjustifiably failed to ship in accordance with contract terms, formal administrative action may be initiated under P&S Act provisions, the Division said.

I.H. Dealers Preview New Models At Hershey

An estimated 175 International Harvester dealers and salesmen from Pennsylvania, Maryland, Virginia and West Virginia previewed three new major models of Farmall and International tractors at a special showing in Hershey recently.

New tractor models on display at the Hershey Hotel included a 60-pto hp. tractor, a 110-pto hp. Turbo tractor, and a 110-drawbar hp. four-wheel-drive tractor plus a variety of tillage equipment and new hay machines.

The meeting was directed by P. W. Gorman, IH farm equipment district manager, assisted by F. G. Rollins, sales manager, and J. I. Ingram, Jr., dealer development manager.

For the Farm Wife and Family

By Mrs. Richard C. Spence, Food Editor

SPENCE

Speaking Of Desserts . . .

Here are a few that will set you up as the world's best cook with your family —

GRAHAM TROPICANA

- 1 cup graham cracker crumbs
- ¼ cup flaked coconut
- ¼ cup coarsely chopped walnuts or pecans
- 1½ tablespoons sugar
- ¼ teaspoon ground cinnamon
- ¼ teaspoon ground mace
- ¼ cup butter or margarine, melted
- 1 cup sliced strawberries
- 1 cup blueberries
- 1 cup sliced seeded or seedless grapes
- 1 cup fresh or canned pineapple chunks
- ⅔ cup sugar
- Grated rind and juice of 1 lemon
- Vanilla ice cream

Place first six ingredients in a bowl. Add butter or margarine; toss lightly with a fork. Cover; set aside at room temperature. Place fruits in a second bowl. Thoroughly blend sugar with lemon rind; add juice. Sprinkle over fruits; toss. Cover and chill. Just before serving, drain fruits thoroughly. Combine with crumb mixture and toss lightly until fruits are coated with crumbs. Serve topped with ice cream. Makes 6 servings.

* * * *

MINT SOUFFLE

- 2 envelopes unflavored gelatine
- ½ cup cold water
- 1 (10 or 11-ounce) jar mint flavored apple jelly
- ½ teaspoon peppermint extract
- ¼ teaspoon green food coloring
- 6 eggs, separated
- 1 cup sugar
- ¼ teaspoon cream of tartar
- 1 pint heavy cream
- Toasted sliced almonds

Soften gelatine in cold water. Heat jelly until dissolved. Stir in softened gelatin. Heat, stirring until gelatine is dissolved and mixture is smooth. Stir in flavoring and coloring. Cool to lukewarm, stirring frequently. Beat egg yolks with ¾ cup sugar until very light and fluffy and pale lemon in color. Gradually beat in cooled gelatine mixture. Beat egg whites until foamy. Gradually add ¼ cup sugar and cream of tartar. Beat until stiff peaks form. Fold beaten egg whites and whipped cream into egg yolk-gelatine mixture. Wrap a double band of waxed paper around 1½ quart souffle dish, allowing 1-inch overlap and 3 inches above rim of dish. Pile souffle mixture into dish. Refrigerate 3 to 4 hours or overnight. Remove waxed paper. Press almonds into sides of souffle extending over dish. If desired, garnish top with whipped cream puffs and/or chocolate curls. Makes 10 to 12 servings.

* * * *

VERY BERRY PIE

- 1⅔ cups graham cracker crumbs, finely rolled
- 1¼ cups sugar
- ¼ cup butter or margarine, melted
- 2 envelopes unflavored gelatine
- ¼ teaspoon salt
- 2 eggs, separated
- ¾ cup milk
- 1 tablespoon lemon juice
- 2 teaspoons grated lemon rind
- 1 teaspoon vanilla extract
- 1½ pints cream-style cottage cheese
- ½ pint heavy cream, whipped
- 1 (3-ounce) package raspberry flavor gelatin
- 1 cup boiling water
- ¾ cup cold water
- 1 cup whole strawberries (halved if very large) chilled
- ½ cup blueberries, chilled
- ½ cup raspberries, chilled

Blend together cracker crumbs, ¼ cup sugar and butter or margarine. Press firmly against bottom and sides of 9-inch pie plate. Bake in a preheated moderate oven (375

degrees) 8 minutes. Cool. In top of a double boiler, combine ¾ cup sugar, gelatine and salt. Beat together egg yolks and milk; gradually add to gelatine mixture. Heat over boiling water until gelatine is completely dissolved, stirring constantly. Remove from heat; add lemon juice, rind and vanilla. Cool to room temperature. At high speed, beat cottage cheese until light and fluffy (about 5 minutes). Reduce speed and gradually add gelatine mixture, beating until smooth and well blended. Chill, stirring occasionally, until mixture is thick (about 30 minutes). Beat egg whites until foamy. Gradually beat in remaining sugar and continue beating until stiff but not dry. Fold whipped cream and then beaten egg whites into gelatine-cheese mixture. Pour into pie crust, mounding around the sides to form a slight depression in the center for the fruit topping (about 6 inches diameter). Refrigerate 2 hours. Dissolve raspberry flavor gelatin in boiling water. Add cold water and chill until the consistency of unbeaten egg whites. Add ½ cup gelatin to fruits and gently spoon into center of pie. Chill until set (about 1½ hours.) Makes 8 to 10 servings.

* * * *

SCALLOPED PEACH CAKE

1 (1-pound, 13-ounce) can peach halves, very well drained
¼ teaspoon ground mace
¼ teaspoon ground cardamon
1 (1-pound, 1-ounce) package pound cake mix
¾ cup milk
2 eggs
1 cup heavy cream
1½ teaspoons finely grated lemon rind
3 tablespoons light brown sugar
1 cup Ricotta cheese

Cut peach halves into three slices. Arrange with tips touching and pit side out against sides of 2 greased 9-inch cake pans. (Reserve remaining slices for garnish.) Add spices to pound cake mix and prepare according to label directions. Pour into prepared cake pans. (Do not spread over peaches). Bake in a preheated slow oven (325 degrees) 40 to 45 minutes or until mixture springs back when lightly touched in the center. Cool in pans on wire cake racks for 10 minutes. Remove from pans; invert on cake rack and flip back. When layers are cold, whip cream in a chilled bowl until very stiff. Fold in remaining ingredients. Spread half between layers and remainder on top. Garnish with reserved peach slices. Makes 1 9-inch layer cake.

* * * *

LEMON STRAWBERRY SWIRL

1 (3¾ ounce) package whipped dessert mix, lemon flavor
2 teaspoons finely grated lemon rind
1 cup cold milk
½ cup slightly crushed strawberries, sweetened to taste (about 1 cup sliced)
6 to 8 small ice cream cones

Combine dessert mix and lemon rind; then prepare with milk according to package directions. Chill 1 hour or more. Before serving, partially fold in strawberries so that mixture looks swirled. Spoon into cones, piling high into fluffy mounds. Serve immediately.

Save Vitamins

If you cook vegetables in lots of water and then pour the liquid down the drain, you may lose nutrients important to your health. Some minerals, ascorbic acid, and the B vitamins are soluble in water. So cook vegetables only until tender in a small amount of water to prevent scorching, remind Penn State extension nutrition specialists.

Teenagers And Their Diets

Did you know that 60 percent of our teenage girls and 40 percent of our teenage boys today have poor diets?

Research confirms the fact that many teenagers need improved eating habits.

Here are some findings of studies on teenagers and their diets:

The older the child the poorer the diet.

The teenage girl is the poorest fed member of the entire family, but teenage boys also need to improve their diets.

Nutrients most often lacking in teenage diets are calcium and ascorbic acid (vitamin C). Iron is often low in the diet of teenage girls. Foods that are high in sugar and fat often replace those with much needed protein, minerals, and vitamins.

Overweight is a serious problem among teenagers.

Teenagers skip breakfast, they make a poor selection of snacks, and they don't drink enough milk.

Teenage girls fear getting fat and more girls are overweight than boys. And more older girls are overweight than younger ones. Both boys and girls need to know more about good nutrition.

Some Tips on Luggage Care

The finest leather used for luggage becomes brittle without some attention Leather creams, special leather soaps, and conditioners are a good investment when you have several pieces of leather luggage to polish. Household paste wax will do wonders to conceal scuffed or worn surfaces. Work a small piece of wax into a damp, clean cloth Apply a thin coat of wax to a small section of the luggage at a time Buff while the wax is still moist Soiled leather may need to be washed with a leather soap, dried, then polished Or use household wax that cleans as well as polishes Apply this kind of wax with a dry cloth and polish at once

Plain soap and water will often remove spots on plastic or composition luggage Stubborn black marks or streaks sometimes can be made

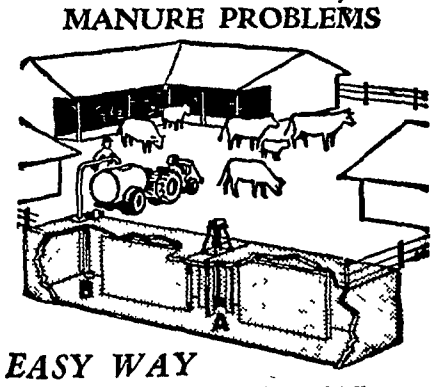
Here's the answer to your MANURE PROBLEMS



EASY WAY MANURE DISPOSAL SYSTEM

Saves Time—Saves Fertility

Just scrape or wash manure, bedding waste and feed into Easy Way holding tank When you're ready, the powerful agitator and self-priming chopper impeller pump will put the homogenized mixture into Easy Way liquid field spreader. No clog — no mess — no stink.

For complete information on the EASY WAY DISPOSAL SYSTEM write to:

CALEB M. WENGER

R. D. 1, Drumore Center KI8-2116, QUARRYVILLE, PA.

Get more throw-power from your horse-power

Starline Silo Unloader discharges silage from up to 24 ft. dia. silos without using auxiliary conveyors. No extra motors to power. No extra equipment to manhandle at door changes. Obstructions can't stop it either, because exclusive "Posi-traction" drive walks the collector arm around any obstruction at the wall wheels while maintaining constant wall pressure. Many other exclusive advantages.

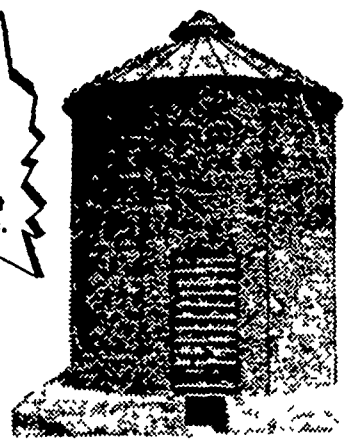
HOG SALE

Feeders weighing 20-35 lbs. sold Saturday for $5.00-$14.75 each. The 341 head of market hogs, the most sold in many weeks, averaged about steady with last week's prices. Lightweights brought 24-26; 180-200 lbs, 25.50-26.25; 200-220 lbs. 25-26 10; 220-240 lbs. 25.75-26 25; 240 lbs. and up, 21.50-25 85. Sows sold for 20.35-21.50.



Still-your best crib buy

$329. with roof and rafters

Over 1200 bu. capacity—means 1st year storage at less than 25¢ per bu.

EXCLUSIVE SPEEDY ROOF RAFTERS MAKE SPEEDY CORN CRIBS

Twice as Fast Twice as easy to erect

Speedy roof rafters guarantee easy, proper placement of roof panels the first time. Rafters add great strength to the roof. Panels need only to be bolted together in three places. It's another big time-saving feature you get only in Speedy Bar-Lok corn cribs.

Stands up best—lasts longer

Wire mesh panels are 5-gauge wire — thick as a ¼" bolt! No bulge or sag. Sturdy 26-gauge galvanized roof is securely anchored to 9 steel roof rafters and side panels. Can't blow off!

Come in today and see the Speedy Bar-Lok corn crib. Let us prove to you that Speedy is twice as fast — twice as easy to erect. Let us show you all the other features that make Speedy Bar-Lok your best corn crib buy.

ties. A demonstration judging contest on the Atlantic Mate-Rite sire recommendation program will be for all visitors, with prizes for winners.

Yoder says the same program will be repeated in the evening, with refreshments served. Tickets for the barbeque are now available from any Atlantic Technician at $1.00 per person.

Bus tours are being arranged from distant service points. Atlantic technicians, area supervisors, directors, and sire committeemen. Tickets and details are available from the local service office.

A large tent will be erected on the lawn especially for the "Parade" Day activities. Atlantic headquarters are located three miles northwest of Lancaster along Route 230 By-Pass.

If flies are about to drive your cattle crazy,

then you better see us fast for

ORTHO DIBROM

1% Fly Spray

If you're sick and tired of fooling around with *weak, half-hearted fly sprays, then you're ready for DIBROM. Minutes after you spray, every fly* that's been hit will be dead or dying. When DIBROM hits 'em, they stay hit Even if they're resistant to other sprays.

DIBROM is registered to spray over and around cattle. In fact, Dibrom in emulsified form is even safe to spray on food crops, up to four days of harvest.

It's easy to use, comes to you ready-mixed and gives you real economy. Sure, it costs a little more than your pyrethrin sprays, but you'll find that it gives a lot better kill So when all is said and done you wind up getting back a lot more of the money that flies have been costing you in reduced milk and meat production.

Come in and see us . . . we'll be glad to show you how to go after flies like you mean it . . . . . with ORTHO DIBROM.

TDN

(Continued from Page 1)

ling purposes before the full nt stage," Dr. Bratzler comented.

The Agricultural Experient Station researcher added at nutrient losses from seepe were low from silage made full dent stage. These losss amounted to less than 10 ercent in experimental silos d were caused mostly by mentation and handling. On e other hand, nutrient losswere over 20 percent, most- from seepage, from silage ade at early stages of maurity in similar silos.

Results of current experiments question the practice of plowing under the stalks and leaves of corn plants solely to improve the soil fertility. Harvested as silage, the corn plant will produce about one and one-half times more feed nutrients per acre than from the ears alone, Dr. Bratzler reported.

● Cow Wash

(Continued from Page 1)

operation of milking machines.

Harold R. McCulloch manager of the dairy show, said stalls being readied include nearly 1,000 in the main exhibition hall to accommodate overflow after all barns and sheds are filled.

Stainless steel sinks that were salvaged from state storage have been erected at convenient locations for sanitizing milking utensils.

McCulloch said most of the cows will be in milk, and that a 35-capacity milking parlor will operate adjoining a central milk house.

Milk handling, by bulk tank, will be supervised by the Pennsylvania Dairy Association Exhibitors whose cows produce 200 pounds or more milk will be reimbursed with a nominal deduction for handling charge.

State Agriculture Secretary Leland H Bull said the show will be sponsored by his department, its Farm Show Commission and the Pennsylvania Dairy and Allied Industries Association, of which Cuthbert Nairn, Douglassville, is president It is open to breeders in the United States and Canada, and is free.

Sod Houses

Those who homesteaded on the plains in the 1870's found very few trees there and so they used the good sod and built houses and outbuildings similar to this one Sometimes they built up against a bank as that required less sod and work.

LORAE HARBALD of Elizabethtown R1 took first place with her intermediate calf Grayholm Skyliner Crissy at the district black and white show this week at Hershey.

● Black & White

(Continued from Page 4)

dale. was bred in the herd of Warren Bollinger, and gave the Ephrata High School junior his first win in major dairy competition. He plans to come back for more in next week's FFA district show at Hershey Reserve junior champion female was John Umble's Swampy Hollow Cinderella from Atglen area of Chester County.

The grand champion bull title also went to the county herd of Robert Kauffman The junior yearling is Penn Springs Leader, a son of Moosehart Pioneer, out of Kauffman's Penn Springs Regal Lucy

Countians also scored in the club herd division with Hess, Kauffman, and J. Mowery Frey Jr, 401 Beaver Valley Rd. Lancaster, teaming up to supply the winning entry.

In the junior get of sire class, Melvin G. Peifer of 1831 Hans Herr Drive, Lancaster, and Frey, the only county entries, took the first and second spots respectively.

Other classes won by area dairymen included intermediate calf—Lorae Harbold, Elizabethtown R1; senior heifer calf—J. Mowery Frey, Jr, dry cow, three and four year old—J. Robert Hess, 2-year-old heifer, never fresh—Conewago Farms, Elizabethtown R2, four-year-old cow—John M Umble, with second place going to J. Mowery Frey, Jr

Judging in the 33-class event was on the modified Danish system which qualifies all blue and red ribbon winners to participate in the Pennsylvania Black and White Show at Harrisburg on September 14

About half the fires on the farm occur in the home, according to the National Safety Council

4-H Club News

JOLLY STITCHERS TO HAVE PICNIC

by Jean Miller, reporter

The Jolly Stitchers 4-H Club of Farmersville will have the club picnic at Lake Texter, Shoeneck, on Wednesday, September 1. A food committee was appointed by president Kaye Smith. Serving on the committee are June Ann White, Diane Wise, Linda Sholtz, Rhoda Halligan, Pam Myer and Jeanette Styer.

A hay ride and bake sale are also planned for the future. Those on the hay ride committee are Barbara Gockley, Jackie DeHaven, Rhoda Halligan, Kathy Shrom, Wanda Willwerth, and Silvia Wissler.

Serving on the bake sale committee are Cindy Kilhefner, Jean Miller, Linda Dochter, Marilyn Halligan, Jane Smith, and Linda Wissler.

The picnic was planned and the committees appointed on Monday, August 23 at the Jolly Stitchers' meeting held at the home of Mrs. Clydeth Buch.

PENN MANOR SEWING CLUB

2ND. YEAR

BLUE: Patricia Eshleman, Paula Harnish, Lucy Kay Herr, Jeanette Shenk, Linda Lou Smith, and Barbara Rorabaugh.

3RD. YEAR

BLUE: Nancy Ann Barkley, Ellyce Engle, Peggy Eshleman, Becky Harnish, Doris Harnish, Joy Hostetter, Anetta Rorabaugh, Anne Marie Smith, and Cindy Whitaker.

RED: Donna Kauffman.

4TH. YEAR

BLUE: Betty Jane Barley, Betsy Ginter, Linda Porter, and Connie Stehman.

RED: Nancy Cramer.

CLASHING THIMBLES TO ENTERTAIN

by Patricia Eshleman, reporter

The members of Penn Manor Clashing Thimbles Club plan to have a party for families on September 11 at the Conestoga Township Elementary School. Rehearsal will be September 10.

The excutive committee is in charge of entertainment. The refreshment committee consists of: Anne Smith, chairman; Margarite and Patricia Eshleman, Joy Hostetter, Joyce Kauffman, Linda Porter and Connie Stehman.

The Civil Service Act prohibits State Civil Service employees from engaging in political activity and from being assessed for political purposes. Employees are guaranteed their rights as citizens, however, and may contribute money to the political party of their choice.

Mr. Dairyman:

Would you spend $1.00 to get $3.00 in return?

Of course you would. Here's how!

Money spent for properly used dry cow feed, if of the right kind and like loaning money on sound collateral to be repaid in 90 days on the basis of $3.00 return for each dollar loaned.

Feeding your dry cows the PIONEER way, may return your feed dollars back to you three-to-one. A dry cow, fed only 600 lbs. of PIONEER DRY & FRESH may return as much as 2000 lbs. more milk. PIONEER DRY & FRESH and THE PIONEER FEEDING PROGRAM gives the dry cow the nutrients she needs to maintain body reserves, produce a vigorous, healthy calf, and freshen strong, ready to go into top production and maintain the pace right through her lactation.

So why not put some money into that bank you have in your barn, and get it back three to one.

There is profit in PIONEER.

Stop in soon or ask our servicemen about the PIONEER DRY COW FEEDING PROGRAM.

REMEMBER there is a PIONEER FEEDING PROGRAM to fit your need.

Bull Beef Production Has Good Future

The maxim that bull beef is suitable only for canning or making bologna needs to be reconsidered, according to researchers at Beltsville, Md

Not that beef from old bulls is suitable for anything more than that

But the quality of lean bull beef from well-grown yearlings has been proved — and has consumer approval — in a number of state and USDA studies And when managed like steers, the bulls have been outstanding in growth and economy of production

Practically all bull beef — of any age — goes on the market today as processed beef And although the market potential beyond this is not fully known, it must be re-examined on the basis of new information on bull feeding

Weanling bulls of the beef breeds grew significantly faster and more efficiently than their twins raised as steers— in closely controlled feedlot trials conducted by ARS scientists E J Warwick, R L Hiner and R E Davis at Beltsville Md The bulls also showed up quite well in most carcass characteristics, although rating a little lower than the steers in tenderness and tastiness

In these trials the bulls gained an average of 2 10 pounds and their steer twins 1 72 pounds per day They ate just a little over 1 percent more feed than the steers but produced 21 percent more daily gain

The bulls reached the slaughter weight of 900 pounds at 15 months of age, the steers at about 17 months. Both groups went on controlled feeding when 6 months old.

The bulls required 7.97 pounds of feed, and the steers 9 50 pounds, to produce 1 pound of gain. This was a saving in feed of 16 to 17 percent Stated another way, the bulls produced 1 19 pounds of beef for every pound the steers produced—on the same amount of feed

The bulls were more economical of feedlot labor and capital, too The steers were in the feedlot for 11 months, but the bulls reached slaughter weight in only 9 months— thus saving some 18 percent in feedlot labor and overhead cost.

The bulls were particularly efficient in putting on lean beef, they had 10 percent more lean in the ninth-to-eleventh rib section than the steers had. And the bull carcasses carried 38 percent less fat — largely waste — over the rib-eye area However, the bulls had about 9 3 percent more bone in the rib section

The bulls also compared well with the steers in the percent of desirable cuts in the carcass Their rib eye averaged nearly one-fifth larger And the bulls' forequarters were a little heavier, chiefly due to a heavier chuck and neck.

A taste panel rated bull beef slightly less flavorful and tender than steer meat, and the Warner-Bratzler shear test confirmed the tenderness difference The steer beef was moderately marbled; the bull meat a little less so The bull beef was also slightly darker

The bull carcasses graded between high Good and low Choice, the steer carcasses, middle Choice — all within the range that consumers consider desirable. The satisfactory quality rating of the bull beef is doubtless due partly to the bulls' rapid growth and youth when slaughtered. The meat had none of the objectionable flavor or other characteristics associated with meat from old bulls

Similar results have been obtained at the agricultural experiment stations of Arkansas, Ohio, Pennsylvania, Nebraska, Tennessee, and Wyoming The Ohio study also indicated that the male hormone and rogen produced in the testis probably is responsible for the better performance of bulls.

The individual who ventures into feeding young bulls also needs more information on what markets will accept his product and how much — and at what prices. Buyers in some areas still discount young bulls heavily. And the producer needs much more information on production — best feeding plans, best market ages and weights, more breed information especially about dairy breeds, and whether bulls will react well under large feedlot conditions.

Wright Brothers First Flight

Our first flying machines were not built by financiers who risked their fortunes, but by boys in barns and backyards who risked their lives. The Wright Bros. ran a bicycle repair shop. Glen Martin built his first plane in a church. Donald Douglas' dream took shape in back of a barber shop in 1920. Matty Laird's plane took wing at 21st and Cicero, Chicago — what was then farmland. Clyde Cessna built his monoplane in an Enid, Oklahoma garage.
